# Majesty

Wood Replacement and New Construction Windows

Lower profile lock

High end architectural design features

When the traditional look of genuine wood is preferred, the Harvey Majesty window is your best choice. It combines the warmth and beauty of wood inside with a maintenance free aluminum clad exterior. The Majesty custom wood window offers endless possibilities for your remodeling or new construction plans.

Because Majesty windows are custom made, that means no additional carpentry is required as with other wood windows.

- All Majesty windows are ENERGY STAR® qualified with standard ENERGY STAR glazing
- Interior available pre-primed
- Fully weatherstripped
- Recessed hardware for unobstructed views
- Two frame types available: 3-1/4" replacement, 4-9/16" new construction with fin
- Locking fiberglass half screen (double hung)
- Standard top sash lift rail (double hung)

## Thermal Performance

Glazing	U factor	R value	SHGC	VT	ENERGY STAR Compliance	Glazing	U factor	R value	SHGC	VT	ENERGY STAR Compliance
<u>Double Hung</u>						<u>Casement/Awning</u>					
ENERGY STAR	0.30	3.33	0.26	0.46	All Zones	ENERGY STAR	0.27	3.70	0.24	0.41	All Zones
<u>Picture</u>						<u>Fixed Casement</u>					
ENERGY STAR	0.28	3.57	0.28	0.48	N, NC, SC	ENERGY STAR	0.26	3.85	0.27	0.47	All Zones

**ENERGY STAR:** This package includes everything that is needed for a product to meet ENERGY STAR requirements. Glazing, gas, glass thickness, etc. will vary by window and usually includes Low-E coating and Argon gas. This glazing package does qualify for ENERGY STAR.

For the most up to date structural and thermal performance values, as well as other product specifications, visit [harveybp.com](http://harveybp.com).

**U-factor** measures the rate of non-solar heat transfer from one side of the window to the other. Heat transfer implies both heat loss out of a living space during cold weather and non-solar heat gain during hot summer months. The lower the U-factor, the better the performance.

**R-value** measures the resistance of a glazing material or fenestration assembly to heat flow. A high R-value window has a greater resistance to heat flow and a higher insulating value than one with a low R-value.

**Solar Heat Gain Coefficient (SHGC)** measures how well a product blocks heat from the sun. The lower the SHGC, the better a product is at blocking unwanted heat gain.

**Visible Transmittance (VT)** measures how much light comes through a product. The higher the VT, the more light that comes through.

## About Harvey Building Products

Harvey has built a solid reputation as a leading manufacturer and distributor of quality building products. A family-owned and operated business with over 50 years' experience, Harvey Building Products is known for outstanding craftsmanship and superior service as well as standing behind every product we make. In addition to manufacturing durable, attractive windows, doors and patio rooms, Harvey distributes a full line of highly respected building products to professional contractors and builders throughout the Northeast.

We understand what it takes to be part of your home.™
